

Nitrile Gloves

Description

Good oil resistance, abrasion resistance and heat resistance
Does not contain protein, has no allergic reaction to human skin, is non-toxic, harmless, durable, and has good adhesion.

Apply

- > White gloves - semiconductor industry, electronic industry, assembly, food processing, etc.
- > Landing gloves - home gardening, kitchen cleaning, cleaning labor insurance and other civil industries.

Features and Benefits

Chlorine Free:

- > Low sulfur, halogen-free, silicone-free, powder-free, heat resistant and wear resistant
- > No oxidation, no corrosion and no pollution to metal electronic components such as gold, silver, and copper.
- > Because no sulfur added, the product does not contain nitrosamines, which eliminates the harm of nitrosamines to the human body and the environment.

Regular:

- > Tear resistant, acid and alkali resistant, hypoallergenic
- > Resistant to acid and alkali, grease, fuel oil, and various solvents
- > The textured surface effect can easily grasp smooth objects, and has good puncture resistance, making it have good protection
- > High cleanliness, suitable for class 100 workshops

Clean Room Environment

- > Class100 ~ Class10000
