

Two Piece Suit

Description

- > Consists of anti-static top and anti-static pants
- > The front zipper and placket design can effectively control the leakage of human dust, and there are patch pockets on the left and right, which are convenient for carrying small items

Apply

- > 0.5cm strip anti-static fabric is generally suitable for industries that do not have strict requirements on static electricity. Less sensitive work environments such as electronics, food, pharmaceutical industries.
- > 0.5 mesh fabric has better conductivity easy connection, better ESD effect, Recommended for workshops with high anti-static and dust-proof requirements.

Features and Benefits

- > Anti-static fabric with 0.5cm stripes in white, blue, and pink
- > White and blue 0.5cm grid 2/3 twill fabric, which is softer and more breathable than conventional fabrics
- > The stitching thread is made of polyester filament fiber thread and conductive thread, which is effectively prevents the dust generated by the thread itself, Keep the performance of each part of the garment connected.

Clean Room Environment

- > more than Class 100000
