

Under Straddle

Description

- > Sleeves with double cuffs and two elastics, easy to operate, neat and tidy design, clean and tidy.
- > The double cuff design can lock the cuffs, the clothes worn under the sleeves will not be exposed, Effectively block the fine dust particles emitted by human body.
- > Two horizontal tabs and five claw buckles on the back of the hat are adjusted to the head to fit better.

Apply

- > Mainly used in semiconductor industry, etc., suitable for environments with higher requirements on static electricity and cleanliness.

Feature and Benefits

- > Open the zipper at the crotch to ensure that the upper body is sealed and better discharge the static electricity generated by the human body.
- > White and blue 0.25cm grid anti-static fabric, 0.25 grid fabric.
- > Smaller grids with finer spacing between conductive yarns and higher fabric density for better conductivity.

Clean Room Environment

- > Class10
